

A Tribute to Einstein & Tesla

Fabien M De Meester¹ & Douglas W Wilson²
TsimTsoum Institute, Krakow, Poland

When one attempts at bridging various fields of Life Sciences, no matter they once were unified and only departed from unity with the ever-increasing level of complexity encountered in pursuing each of them, one runs the obvious risk of being discredited as *Philosophers* by the Scientific Community. However, complexity often refers to lack of understanding and Life Sciences as they progress tend to demonstrate that God/Nature went the least complicated – read most energetically favorable – way in designing/developing the environment – including ourselves – we live/thrive in. It rather is more a question of time/space for Humans to understand commonly observed natural phenomena than ones of complexity. And, in that respect, *Philosophy* does appear to help rather than to hinder progress. This essay has that ambition of bringing pieces of evidence together, from mathematics to physics, chemistry, biology, psychology, and philosophy, in a way to identify a common sense of relevance for Nature to evolve the way it does as per Human’s observation.

From Nothing to Everything

Scientifically, one needs to explain how all one experiences in this world could ever have emerged and evolved from nothing and then explain/define what nothing is/means. To some degree, the definition of nothing as “0” in mathematical terms does help a long way in progressing since from there/then all one scientifically develops/drives in terms of a unified Theory owes to respond to that most unique condition of Existence/Evolution that it emerges/derives from nothing or “0”. It *in fine* is an enormous simplification. If there was nothing to start with, then there is no point/need to look for an Inventor. The empirical definition of “nothing” as a set of 9 elementary information – self-annihilating, individually and 3x3-mutually – requires a cognitive element (humans) capable of

¹ Fabien De Meester: fdm@tsimtsoum.net

² Douglas Wilson: douglas.w.wilson@hotmail.com

interpreting ± 4.5 billion light-years of evolution. Within that framework of understanding, the discoverer/inventor is among & between us. No point/need to look elsewhere. The next steps of evolution depends on us, each & all of us, only. Humanity as a whole is God/Evil as per terms of common usage.

The “0” condition imposes a number of restrictions to the definition of “nothing”: Mathematical concepts that self-annihilate in the absence of time/space, yet can potentially explain “everything” as one observes it upon release of time/space come down to a minimum set of nine (9) self- & three-by-three (3x3)-mutually annihilating information, ie

$$0 \leftrightarrow 1 + 2 + 3 + 4 + 5 + 6 + 7 + 8 + 9 = 45 = 4 + 5 = 9^r$$

where r is the digital root of 9.

From there, one can re-construct the before-0 mathematics, which did prevail until the BigBang. By definition, such a mathematical concept is a resonance of two opposite concepts, which cancel off faster than the speed of light. It is, basically, what is contemporarily referred to as a black hole (Fig.1).

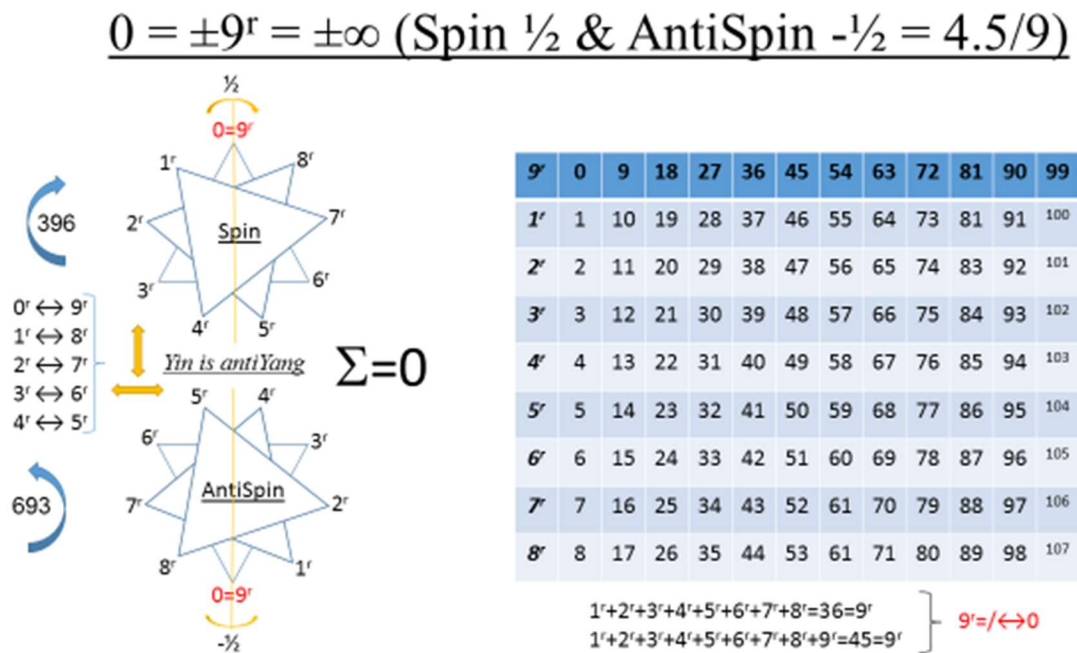

Fig.1. Spin & Antispin

Time/Space → Linear 0123456789101112....

No Time/Space → Circular 0↔123456789^r

(The mathematical concept of limits - $\pm\infty$ - does encompass the two-fold requirements that (i) “0” did not exist before the BigBang, and (ii) time/ space expands in “nothing”).

In absence of time/space, there is no light, no mass/charge, and, therefore, certainly no life and no Life Sciences. However, mathematically, the minimum set of nine (0↔123456789) information as we know of nowadays can probabilistically organize itself in an infinite number of combination, from which a unique one – usually referred to as the Fibonacci Series (911235843718988764156281) – appears to fulfill that specific requirement, *ie* being self- & three-by-three (3x3)-mutually annihilating. In that unique case, a set of three physical wavelets for light, mass and charge appears to be produced along with time/space (primordial wavelets) and crystallization (BigBang) ensues with concomitant release of the anti/self-annihilating contribution (black holes, electromagnetism & gravity) (Fig.2).

Origin of the Milky Way: YinYang/TsimTsoum (YY/TT)

All 9 Yin/Yang Solfeggio frequencies (174/825.285/714.396/693.417/582.528/471.639/369.741/258.852/147.963/936)Hz = 0/9^r

Origin of the Milky Way: 0↔123456789 with $\Sigma=45$ (9') & 0↔9^r → Fibonacci Series (0↔911235843718988764156281) with $\Sigma=117$ (9') & 0↔9^r → Crystallization → Evolution

The frequency of a YY/TT is reduced to the mathematical probability of the spontaneous arrangement of „nothing“ (0) 0↔123456789 into 0↔911235843718988764156281 (Fibonacci Series),

in which unique case a set of 3 physical wavelets (light/mass↔charge) is produced along with time/space (primordial wavelets) & crystallization ensues, with concomitant release of the anti/self-annihilating contribution (blackholes, electromagnetism & gravity).

Light, Mass & Charge L,M,Q are co-manifestation of self-annihilating Energy/Information in absence of Time/Space. Upon crystallization, anti-corresponding co-manifestation of L,M,Q (Blackhole, ElectroMagnetism & Gravity) ensues.

Fig.2. Our Galaxy

*In absence of time/ space, “0” does not exist. It comes into existence at the BB (t₀).
Fibonacci figures are reminiscent/ remnants of the mathematical geometry prior to the BB (no time/ space).*

It is interesting to note that mass and charge are degenerated in the absence of space/time; they are only “1” or better say equivalent or in resonance, which in turn gives rise to the 1/2 spin. In time/space, light speed (<< resonance) becomes the limit for the diffusion of information, which then gives rise to mass and charge as two independent expression/phenomena of information, ie I (-101). The wave:particle (light:mass/charge) equivalence finds its extension all along with Evolution from white spaces/black holes to mind/body co-existence, as well as its visualization in the double-slit experiment (Fig. 3).

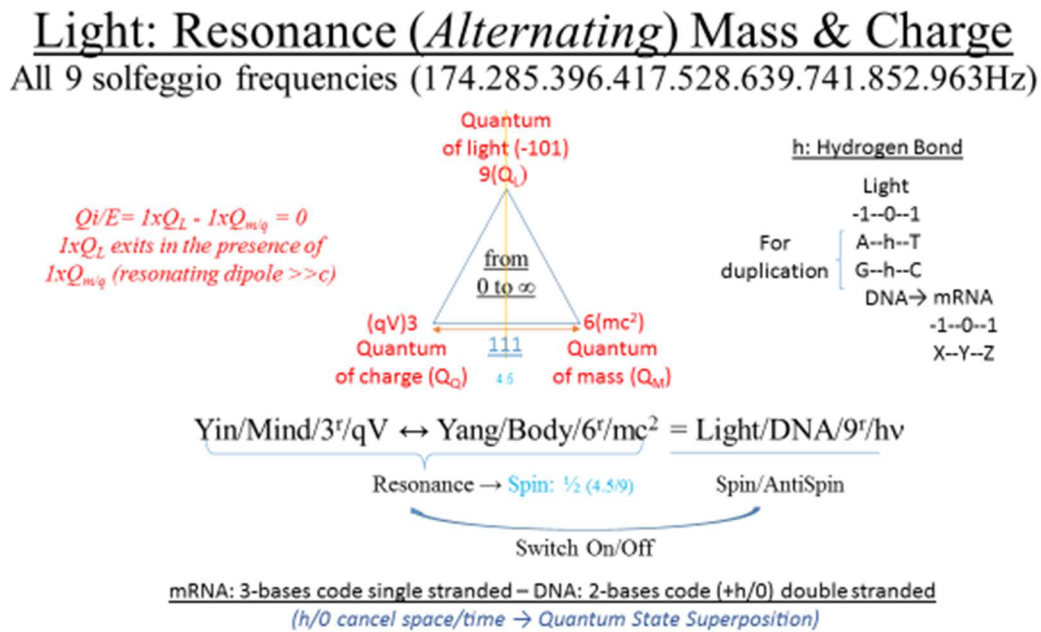

Fig. 3. Mind/Charge, Yin/Yang Resonance. Sum/Aver 9 frequencies Solfeggio: 4995Hz(9r)/555Hz(6r) – Yin: 1665Hz(9r)/555Hz(6r) – Yang: 1332Hz(9r)/444Hz(3r) – 0: 1998Hz(9r)/666Hz(9r).

(<https://www.quora.com/> & <https://www.quora.com/Why-did-Tesla-say-that-3-6-and-9-was-the-key-to-the-universe>).

Yin = Female (<https://www.chenot.com/blog/the-importance-of-yin-yang-balance-in-mind-and-body/>) & (<https://www.quora.com/Is-the-male-body-and-soul-yin-or-yang>).

The physicochemical life-sustaining hydrogen bond (h) that allows subquantum energy/information (-101) to flow from the subatomic immaterial/non-temporal world to the molecular material temporal macro-reality one lives in, and back (A-h-T, G-h-C) unites all the information within and around us in a way orchestrated by individual evolving phenotypes. The vibrational energy/information captured in all atoms of matter on Earth – see the Medeleev Table – continuously flows through the oxygen atom of the water molecule and is rendered available through its two hydrogen atoms, holographically,

everywhere, at any time, to each & all. That is to say that the two worlds, ie quantum & atomic/molecular, not only co-exists but closely/constantly interact and – *in fine* – are the most single essential characteristic/condition for Life on Earth. And most definitely, there is no need for a BigBang for this to happen.

From Everything to Nothing

Looking back into perspective, *ie* moving back in time/space as a way to approach the Truth wrt the origin of “everything” – one must admit that the notion of “nothing” is peculiar to say the least. It can be defined scientifically, without ambiguity, as being a set of self- & mutually annihilating elementary information, which then immediately raises the cognitive question mark of where they originally come from. However, it also is more a semantic than a scientific quest at that stage of progress of Humanity since, scientifically-speaking, $0/9^r$ has been defined and shown to be all what is needed to explain “nothing↔everything”. It all seems as if Science would need Philosophy all-of-a-sudden if only to address that all too un-famous weakness – read lack of humility – of *Homo sapiens* on his/her way to *Homo modestis*. But there is more than that. One should not neglect the very fact that cognizant Humans are an integral part of the system under observation/description here; musical tones are most typically cognizant humans’ masterpieces of communication/exchange that have unconsciously evolved from that interface between non-temporal subatomic and temporal atomic worlds, and they perfectly respond to the mathematical condition set earlier by the $0/9^r$ most single ultimate solution of the “nothing↔everything” Unified Theory. And still, one needs at least one Human to play music. The same observation comes to mind for everything one observes in/around us, to the extent that one must reasonably conclude that Humanity created it all over the past 70Kyr. It is not a lack of humility to state that God is among/between us, *ie* *Homo modestis*.

2x 9(3x3) Solfeggio = 3x 6-mirrored Solfeggio

All 9 Yin Solfeggio frequencies (174.285.396.417.528.639.741.852.963Hz) & all 9 Yang Solfeggio frequencies (825.714.693.582.471.369.258.147.936Hz)

Yin Solfeggio's in white – Yang Solfeggio's in black

$$\begin{aligned} \Sigma(174+111=285, 582+888=471, 741+111=852, 825+888=714, 417+111=528, 258+888=147) &= 999 = 9^r = 0 \\ \Sigma(285+111=396, 471+111=582, 852+111=963, 714+111=825, 528+111=639, 147+111=258) &= 666 = 9^r = 0 \\ \Sigma(285+888=174, 471+888=369, 852+888=741, 714+888=693, 528+888=417, 147+888=936) &= 333 = 9^r = 0 \end{aligned}$$

Yin Yang Yin Yang Yin Yang

Fig. 4 - The Benzene Molecule

(A molecular model of the remnant "Secret" of the pre-Universe)

The vibrational modes of the benzene molecule have been precisely calculated and shown to correspond to precisely identifiable absorption bands in Infrared & Raman spectroscopies (Fig.X).

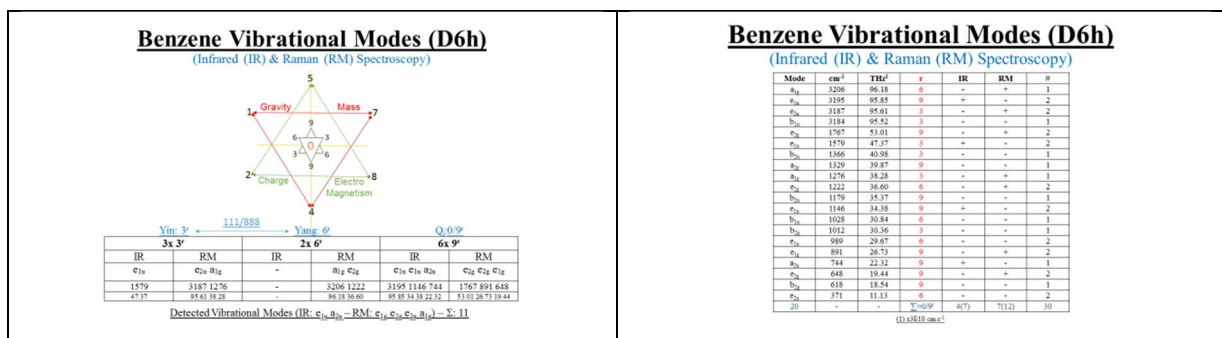

Fig. 5

The energy/frequency sum of all benzene vibrational modes (detectable or not via IR/RM) is 1347.84Hz (44,932cm⁻¹), which in absence of time/space comes down to the integral sum (Σr) of 27(198) or 0/9^r → Benzene simply is the physicochemical manifestation (matter/charge, electromagnetism/gravity / s-electrons) in time/space of a mathematical

combination (pixel spin/antispin -101 / p-electrons) of self- & 3x3-mutually-annihilating information (0↔1+2+3+4+5+6+7+8+9) in absence of time/space. The benzene molecule hence appears as a perfect molecular model of the “Secret” of the Universe and/or perhaps more precisely of the remnant “Secret” of the pre-Universe, in absence of time./space It becomes clear that it is the combination of information (-101/396/p-electrons) that gives rise to matter/charge (147/258/s-electrons) and not the other way around.

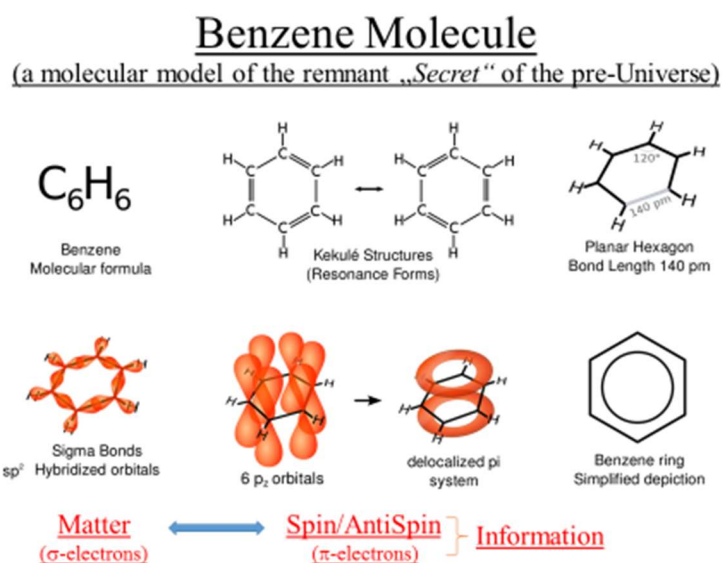

Fig. 6. Mind & Body are in resonance just as are pi & sigma electrons.

*Definition of “0” or “Nothing”
(as 9^r or “Everything”)*

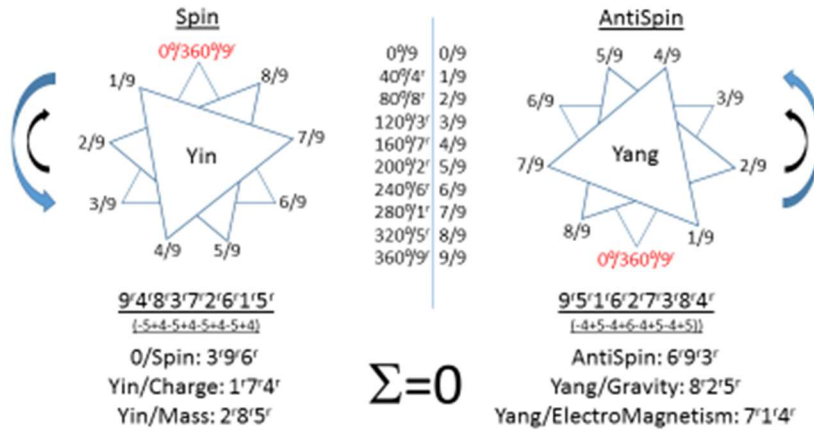

In absence of time/space → matter/charge, electromagnetism/gravity, the definition of “0” or “Nothing” simplifies to -101/396 geometrically/mathematically with the 3 to 6 and 0 to 9 equivalences and, from there, all is indeed about Vibration, YinYang, TsimTsoum, and/or the V/H-mirror/invertor as per the Fibonacci Series (Fig. 7).

Fig 7

At the Planck constant scale, resonance implies inseparable entities, duality wave-particle, multiple states/superposition, position vs momentum, entanglement (spook action at a distance), subjective measurement. Light does not exist per se, but only if/when/because it cancels off with resonating mass \leftrightarrow charge. $\pm 0/9^r$ is a self-annihilating two-directional wavelet in absence of space/time (Planck constant). That appears to be the definition of 0 or “nothing”, ie the resonance of two opposites (1,0,-1) / (3,9,6) / (Yin,0,Yang), where $0/9^r$ is a kind of inverting mirror which makes the sum of each two resonating elements equal to $0/9^r$. Upon space/time, “Nothing” ($0/9^r$) = one quantum of light (Photon) annihilated by one oscillating dipole of mass \leftrightarrow charge. White Space Pixel Spin (396) & Atom Mass (174)/Charge (285) are in Resonance with 0 (Planck Cst). Black Hole Pixel AntiSpin (693) & Atom ElectroMagnetism (825)/Gravity (714) are in Resonance with 0. Mind (Pixels) = Encoded/Imprinted *double-leaflet* Cell Membrane Omega-3,9,6-Fatty Acids = Spin (1)/AntiSpin (-1). Body = Atom (Mass & Charge)/(ElectroMagnetism & Gravity). The YinYang is complete and ready to evolve all-the-way down to the 9 reference Solfeggio frequencies (Fig.8).

All 9 (3x3) Yin/Yang Solfeggio frequencies (174/825.285/714.396/693.417/582.528/471.639/369.741/258.852/147.963/936Hz) = 0/9^r

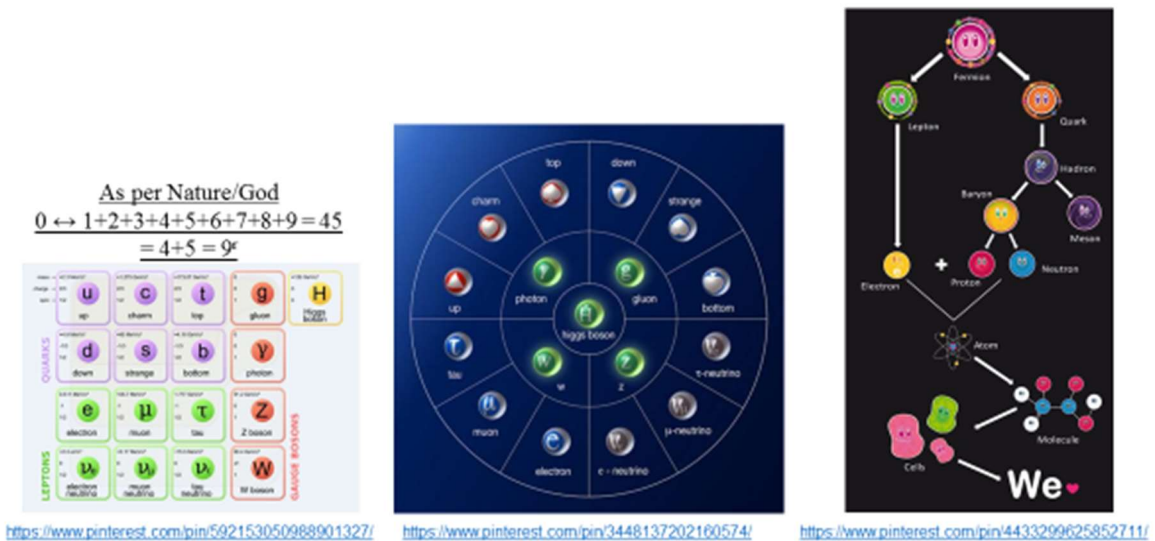

Spin is to AntiSpin what is Charge to Gravity & Mass to ElectroMagnetism, Yin to Yang (geometrically/mathematically)

Fig.8. Spin & AntiSpin as per Han's Philosophy & Benzene's Chemistry.

(Matter & Mass (bodies) are observational consequences of local information fields (Minds) with which they are in resonance. Music/Vibration therapy is all about synchronizing Solfeggio frequencies with those mind pixel fields).

Back to physics, and with no intention of elaborating on the current status of affair, one must admit that the very fact that the *Standard Model* does include 17 (+1 quantum graviton) or 0/9^r information – read elementary subatomic particles – comes strikingly in support of the tentative (philosophical) conclusion that – yes - there was nothing: no time, no space, no matter, no charge, no light, no energy, nothing... and there will be nothing. However, there is everything in between. It all is about an optical illusion with the self-aware/conscious observer being part of the trick (Enlightenment) (Fig.X).

Information: Elementary Subatomic Particles

The Standard Model with its 18 (0/9^r) Elementary Subatomic Particles.

(Current status of understanding in layman terms: Elementary Subatomic Particles are a unique set of self-annihilating Information which – upon hazard at the image of a Lottery – can eventually assemble themselves in a peculiar way that gives rise to Reality as we observe It).

Tentative conclusion

It all looks like Einstein and Tesla were right. It is all about energy, vibration, frequency. They could not get to the final touch of their genius thoughts/theories because of their Education forged into the Homo *sapiens* fear-fed derived God mind-box. Their legendary mutual misunderstandings/conflicts found their sources in their young age's mind-wash, which most unconsciously, their respective families/environments submitted them to. Time/space has come to clean the board and to restart from here, strong of their Legacy. Thank you, Guys... Most respectfully.
